LYNDON BAINES JOHNSON ARCHIVES, 1927-1967

In 1958, the Johnson staff instituted a records management program in the office which included a plan to dispose of non-current files. They set up the Lyndon Baines Johnson Archives (LBJA) to house items to be permanently retained rather than scheduled for disposal. Johnson files from the House and Senate period were screened, and selected items and files were moved to the LBJA file. Between 1958 and 1963, the staff continued to add to the file. Occasionally items were added during the White House period. The LBJA consists of four parts: a Congressional File, a Famous Names File, a Selected Names File, and a Subject File.

NATIONAL SECURITY FILE, 1963-1969

This file was the working file of President Johnson's special assistants for national security affairs, McGeorge Bundy and Walt W. Rostow. Documents in the file originated in the offices of Bundy and Rostow and their staffs, in the various executive departments and agencies, especially those having to do with foreign affairs and national defense, and in diplomatic and military posts around the world. Approximately one-half of the National Security File has been processed. Those folders whose titles are preceded by an "*" have been processed and their contents declassified in whole or in part. Lists of classified documents have been placed in those folders, and you may request mandatory review of individual documents which have not yet been declassified in full. Those folders not preceded by an "*" are unprocessed and are not subject to mandatory declassification review. Consult with a member of the staff on the processing schedule.
